

TOUGH GET'S TWISTED

WITH THE NEW TIMBERLAND PRO®
BOA® FIT SYSTEM

1. BOA DIAL

Tuned and tested to the highest standards, BOA dials provide the ultimate fit experience so you can focus on what matters most. Varying in size, design and interface, the dial fine tunes fit with precision, allows for quick release, and never settles on performance.

2. BOA LACE

The workhorse of the BOA Fit System, our laces routinely tolerate the toughest tests. Lightweight, super-strong, and expertly configured for performance.

3. BOA LACE GUIDES

Our lace guides replace traditional eyelets, and the deficiencies that come with them. We designed our lace guides to optimize the BOA Fit System by minimizing friction and promoting even closure in a way that wasn't possible before.

The BOA® Fit System revolutionizes the way you experience precision fit, specifically engineered for peak performance in the harshest of conditions. With its micro-adjustable design, this system offers a level of customization that ensures your feet are comfortable and secure with enhanced connectivity between the trades athlete and their gear. Timberland PRO® proudly presents the next level of fit and performance with the all-new BOA® Fit System.
